HOBBIES

ABOUT ME

AUTOMATED AND MANUAL QA ENGINEER

The foundation of my automated tests is Java, Selenium, and JUnit. I hold the highest-rated CUBES certificate for both manual and automated testing. More details about me can be found on the website: kokinbg.net

IT EXPERIENCE

INTERNSHIP IN CUBES IT COMPANY, BELGRADE OCTOBER 2022 - JUNE 2023

Responsibilities included writing and executing manual and automated test cases.

For manual testing, I performed a thorough analysis of designated parts of the application and executed all functionalities manually to ensure correctness and identify any bugs that required fixing for the seamless operation of the web application.

Building upon the manual test cases, I developed automated tests using Java programming language, utilizing the Selenium framework and JUnit tests.

Collaborated effectively with the team by daily project linking on GitHub and accessing daily and periodic tasks through the JIRA platform.

EDUCATION

CUBES SCHOOL OF PROGRAMMING, BELGRADE: 2022
